Education

Marwadi University, Rajkot – B.Tech. Computer Science and Engineering Expected 2026

Experience

Fullstack Developer Dec 2024 - Dec 2025

TMS Groups Gurugram

- Engineered and deployed on TMS Server, an automated payroll system using **NextJs** and **MongoDB**, reducing processing time by 40% and eliminating 95% of manual calculation errors.
- Designed and implemented an employee time-tracking solution that increased accuracy of billable hours by 30% and reduced payroll processing time from **3 days** to **4 hours** per cycle.
- Facilitated the digital transformation of TMS Groups by implementing a fully responsive Next.js website, resulting in a **75%** surge in online inquiries within 3 months of launch.

Freelance May 2024 - July 2024

Lieferando Remote

- Revamped the core interface architecture, boosting **user engagement by 35%** and decreasing average navigation time by 22%.
- Reconstructed user workflows with a modular design system, leading to a **40% increase in task completion rate** and enhanced user satisfaction scores.
- Spearheaded UX enhancements that drove a **25% increase in user retention** and resulted in a **30% reduction in monthly support tickets**.

Projects

Payroll Management System: Next.js, CSS, Typescript, MongoDB | 🌐 September 2024 - Present

- Built a complete Payroll and HR ecosystem supporting multi-unit businesses with **50+** features including employee management, attendance tracking, and statutory compliance.
- Implemented a full statutory compliance engine (**EPE, ESIC, LWF**) and built export-ready government filing modules, reducing manual compliance workload by **70%** and ensuring **100%** accuracy in statutory calculations.
- Orchestrated a **scalable reporting** and **export pipeline (PDF/Excel)** with company-wise and custom-range consolidation, accelerating payroll insights generation by **60%** for multi company businesses.
- Developed an integrated **double-entry** accounting system with financial statements (**P&L, Balance Sheet, Trial Balance**) and **5-role RBAC security**, enabling seamless financial management and secure access control for **100+ users**.

Analytics Dashboard: Next.js, Typescript, MongoDB. | 🌐 Mar 2025 - Apr 2025

- Crafted a high-performance analytics interface in Next.js 16, TypeScript, and Tailwind CSS, improving UI responsiveness and visual clarity by **40%** through component modularity and optimized layouts.
- Enhanced user insight delivery by integrating **Recharts-based visualizations** and **simulated live KPI updates**, increasing data interpretability by **55%** for marketing metrics.
- Formulated an interactive customer data table with multi-column sorting, filtering, pagination, and CSV export, streamlining data navigation efficiency by **35%**.
- Elevated backend reliability by designing API routes with mock-data fallbacks and polling-driven update behaviors, ensuring **100%** UI availability even under database downtime scenarios.

Technical Skills

- Frontend development:** React, Next, JavaScript, TypeScript, Tailwind CSS
- Backend Development:** Java, Node, Express, Go
- UI/UX Design:** Responsive Design, UI Optimization, Component-Based Architecture, User-Centered Design
- Version Control and Collaboration:** Git, GitHub
- Tool:** Cursor, Lovable, Docker, Kubernetes, Postman, Vercel, MongoDB

Certifications

- DevOps Beginners to Advanced with Projects** | Udemy | May 2025
- AWS Cloud Essentials** | Credly | Aug 2024
- Python Data Structures** | Coursera | Aug 2023
